Quarterly Project Progress Report

UPPER SALMON RIVER
CHINOOK SALMON REARING PONDS

Project No. 88E25033

Contract No. 03-6-208-35444

Period Covered: October 1, 1976 to December 31, 1976

Columbia River Fisheries Development Program

February, 1977

Pahsimeroi Rearing Pond
(Summer Chinook)

Eyeing and Hatching of Eggs

Of 302,000 summer Chinook eggs taken at the Pahsimeroi station in September, 89% survived to eye-up. The remaining 269,000 eggs were transferred to Mackay Hatchery during October. This was about 39,000 more eggs than were eyed last year.

At the end of the quarter we had about 264,000 of these fish at about 1,058 per pound and they were doing well at Mackay Hatchery.
